DATE RECEIVED: _____

**UNDERGROUND STORAGE TANK SYSTEM
CLOSURE REPORT FORM**

Owners who are permanently closing underground storage tank systems may use this form to demonstrate that a storage tank system closure was performed in accordance with technical guidance document 263-4500-601 "Closure Requirements for Underground Storage Tank Systems". PLEASE PRINT OR TYPE. COMPLETE ALL QUESTIONS.

SECTION I. Owner/Facility/Tank/Waste Management and Disposal Information

1. Facility ID Number 09-30778
2. Facility Name Finch Petro
3. Facility County Bucks
4. Facility Municipality Warminster
5. Facility Address 610 York Road Warminster, PA 18974
6. Facility Contact Person Ijmal M. Ali
7. Facility Telephone Number (215) 956-1670
8. Owner Name Finch Petro, LLC
9. Owner Mailing Address 610 York Road Warminster, PA 18974
10. Description of Underground Storage Tank Systems (Complete for each tank system closed)

Describe Closure Activities:

Finch contracted Matt's Valley Petroleum, Inc. (Matt's Valley) to replace the Ultra tank (001) and reline the regular product tanks (002 & 003). Matt's Valley subcontracted the tank removal work to ECI, LLC (ECI) who is a licensed tank removal contractor in PA. Personnel from ECI mobilized to the Site on June 17, 2019 to replace tank 001 with a new 12,000-gallon fiberglass tank. Once the Ultra tank was uncovered, ECI recommended that all three tanks be upgraded with new fiberglass units and feed lines as the existing tanks had been in service for approximately 35-plus years. Based on ECI's recommendation, Finch decided to replace all three units during the tank upgrade. ECI re-mobilized to the project site on Monday July 15, 2019 in order to begin disconnecting electrical connections and other tank components in preparation for tank extraction. Excavation work began on Tuesday July 16th with the removal of fill from around tank 001 by utilizing a JCB 83 L track excavator. Petroleum contaminated pea gravel and soil removed from the excavation were placed/stored on plastic covered asphalt/concrete surrounding the excavation. On Wednesday July 17th Monarch Environmental, Inc. (Monarch) arrived on site to remove of any remaining product and sludge in tanks 002 & 003 before extraction. After allowing the three tanks to naturally vent overnight, ECI proceeded to dismantle the tanks using the excavator bucket and placed the contents into 20-cubic yard rolloff's on July 18th. Tanks 002 & 003 were compacted into one rolloff while tank 001 was place into a second container. RT conducted attainment soil sampling on Tuesday July 24th using a systematic random sampling plan. Due to groundwater seeping into the pit, RT collected twelve (12) sidewall soil samples (refer to Table 1 & Figure 1). Parameters tested were either below the laboratories method detection limits or below the Residential Statewide Health Standard (SHS) Medium Specific Concentration (MSC) for the constituents of concern analyzed. Contaminated soil was removed from the site on August 8, 2019 and transported to the Clean Earth facility in Morrisville. Matt's Valley installed three (3) new 12,000-gallon fiberglass UST's and associated pump lines during August.

Yes N/A

11. Briefly describe the storage tank facility and the nature of the operations which were conducted at the facility (both historical and present) **including use of the storage tank systems:**

The project Site has historically operated as a retail gasoline service station since the 1950's. The property operated three (3) 12,000-gallon unleaded gasoline underground storage tanks (USTs), dispenser islands and associated piping which were installed in 1983. Tank 001 was taken out of service on September 27, 2018 while tanks 002 & 003 operated until July 15, 2019.

- ☒ ☐ 12. A site location and sampling map of the site, drawn to scale, is attached. See page 11 of 11.
- ☒ ☐ 13. Original, color photographs of the closure process are attached (i.e., inside of excavation/piping runs, pit water, tanks showing condition).
- ☒ ☐ 14. An amended "Storage Tanks Registration/Permitting Application" Form was submitted to the DEP, Bureau of Environmental Cleanup and Brownfields, Division of Storage Tanks, P.O. Box 8762, Harrisburg, PA 17105-8762.
- Date: 10 / 18 / 2018
- ☒ ☐ 15. If a release was confirmed, the appropriate regional office of DEP was notified by the owner or operator.

Date: 7 / 24 / 2019

Office: Norristown

Yes N/A

16. If tanks were cleaned on-site:

a. Briefly describe the disposition of usable product: Usable product was removed from tank 001 (Ultra) by Sunoco in October 2018. Usuable product from the regular gasoline storage tanks (002 & 003) was removed by Sunoco on July 19, 2019.

b. Briefly describe the disposal of unusable product, sludges, sediments, and wastewater generated during cleaning. Provide the name and permit number of the processing, treatment, storage or disposal facility. (Attach documentation of proper disposal):
Any unusable product, sludges and wastewater generated during tank cleaning was removed by Monarch Environmental Recycling, Inc. on July 17, 2019. A total of 2,902-gallons was transported to their recycling facility at 108 East Lake Road in Woodstown, NJ. EPA ID: NJD011881174

c. If tank contents were determined/deemed to be hazardous waste, provide:

(1) Generator ID Number: _____

(2) Licensed Hazardous Waste Transporter Name and ID Number: _____

17. If tanks were removed from the site for cleaning:

a. Provide the name and permit number of the processing, treatment, storage or disposal facility performing the tank cleaning: _____

b. If tank contents were determined/deemed to be hazardous waste, provide:

(1) Generator ID Number: _____

(2) Licensed Hazardous Waste Transporter Name and ID Number: _____

18. Briefly describe the disposition of tanks/piping (Attach documentation of proper disposal):

The tanks were crushed on-site and placed in two (2) 20-cubic yard rolloffs. The containers were transported to the A. J. Catagnus, Inc. facility at 1229 W. James Street in Norristown, PA.

19. If contaminated soil is excavated:

a. Briefly describe the disposition and amount 642.5 (tons) of contaminated soil. Provide the name and permit number of the processing, treatment, storage or disposal facility. (Attach documentation of proper disposal):

Contaminated soils from the tank closure operation were transported by B. Blair Corporation to the Clean Earth of Southeast PA. facility in Morrisville on August 8, 2019 (Permit # 301254).

b. If contaminated soil is determined/deemed to be hazardous waste, provide:

(1) Generator ID Number: _____

(2) Licensed Hazardous Waste Transporter Name and ID Number: _____

Yes N/A

☐ ☒ 20. Briefly describe the disposition of and amount _____ (tons) of uncontaminated soil and debris (attach analyses):

☐ ☒ 21. If the tanks were "Closed-in-Place" provide information below:

a. Briefly describe the tank cleaning process: _____

b. Describe the inert, non-shrinking material placed into the tanks:

I, Ijmal M. Ali, hereby certify, under penalty of law as provided in 18 Pa. C.S. §4904 (relating
(Print Name)

to unsworn falsification to authorities) that I am the owner of the above referenced storage tank system(s) and that the information provided by me in this closure report (Section I) is true, accurate and complete to the best of my knowledge and belief.

Title

UNDERGROUND STORAGE TANK SYSTEM CLOSURE REPORT FORM

SECTION II. Tank Handling Information

Facility ID Number 09 - 30778

DEP Tank ID Number(s) 001, 002 & 003

Yes N/A

1. Briefly describe the excavation and initial on-site staging of uncontaminated/contaminated soil and debris:

Contaminated material was removed via excavator and staged on plastic adjacent to tank excavation. Material was covered each night with a plastic tarp.

2. Briefly describe the method of piping system closure and the closure of the piping systems, including the quantity and condition of the piping:

Piping was closed by removal. Pipe was FRP in excellent condition.

3. Briefly describe the condition of the tanks and any problems encountered during tank handling or tank removal activities:

Tank 001 apparently had a hole in it. Tanks 002 & 003 were in good condition. All UST's were single wall FRP. No problems encountered during removal.

4. Briefly describe the method used to purge the tanks of and monitor for hazardous or explosive vapors:

UST's were air educted and monitored with an LEL.

- ☒ ☐ 5. If tanks were cleaned on-site:

a. Briefly describe the tank cleaning process: All remaining sludge, sediment and product was removed via vacuum truck (Monarch) under the direction of ECI prior to tank removal from the tank field.

b. If subcontracted, name and address of company that performed the tank cleaning:

- ☐ ☒ 6. If tanks were "Closed-in-Place", briefly describe the tank fill material: _____

- ☒ ☐ 7. If contamination was suspected or observed, the "Notification of Contamination" form was submitted.

I, David J. Spause, hereby certify, under penalty of law as provided in 18 Pa. C.S. §4904 (relating to
(Print Name)
unsworn falsification to authorities) that I am the certified remover who performed the tank handling activities associated
with the closure of the above referenced storage tank system(s) and that the information provided by me in this closure
report (Section I) is true, accurate and complete to the best of my knowledge and belief.

UNDERGROUND STORAGE TANK SYSTEM CLOSURE REPORT FORM

SECTION III. Site Assessment Information

Tank Registration # 001 (complete one sheet for EACH tank system and attach ALL laboratory sheets pertaining to that system)

Facility ID Number 09 - 30778

A. Provide depth of *BEDROCK* and *WATER* IF encountered during excavation or soil boring (write "N/A": if NOT encountered).

Bedrock N/A feet below land surface

Water 13 feet below land surface

B. Provide Length of *PIPING* IF piping was closed-in-place (write "N/A" if NOT closed-in-place).

Length of piping N/A feet

C. TANK SYSTEM REMOVED FROM THE GROUND/SITE

1.) Was obvious contamination observed while excavating, sampling or removing the tank system?

☐ NO -----> Conduct confirmatory sampling -----> See end of this section for options on submission and maintenance of closure records -----> Do not complete item C.2. below.

☒ YES -----> Report release to DEP within 24 hours -----> Describe contamination observed and likely source(s) (tank, piping, dispenser, spills, overfills): Contamination consisted of impacted pea gravel and soil within the confines of the tank excavation. Release occurred from Ultra tank (001) which failed the tank tightness testing on September 12, 2018.

-----> Complete item C.2. below.

2.) Was contamination localized (within three feet of the tank system in every direction with no obvious water contamination)?

☐ YES -----> Remove or remediate contaminated soil -----> Conduct confirmatory sampling -----> See end of this section for options on submission and maintenance of closure records -----> Call Indemnification Fund (717-787-0763).

☒ NO -----> Continue Interim Remedial Actions -----> See end of this section for options on submission and maintenance of closure records -----> Call Indemnification Fund (717-787-0763).

D. TANK SYSTEM CLOSED-IN-PLACE OR CHANGED-IN-SERVICE

Was obvious contamination observed during sampling, boring or assessing water depths?

☐ NO -----> Conduct confirmatory sampling -----> See end of this section for options on submission and maintenance of closure records.

☐ YES -----> Report release to DEP within 24 hours -----> Describe contamination observed and likely source(s) (tank, piping, dispenser, spills, overfills): _____

Continue with corrective action -----> See end of this section for options on submission and maintenance of closure records -----> Call Indemnification Fund (717-787-0763).

E. If the answer to C.1. is "no", the answer to C.2. is "yes" or the answer to D. is "no", confirmatory samples are required. Use the sample/analysis information sheet on page 10 of 11 to provide the information on confirmatory sampling and complete the diagram on Page 11 of 11.

Options for Submission and Maintenance of Closure Site Assessment Records

Records of the site assessment must be maintained for at least three years after completion of permanent closure or change-in-service in one of the following ways:

- (a) By the owners and operators who took the tank system out of service;
- (b) By the current owners and operators of the tank system site; or
- (c) By mailing these records to the DEP regional office responsible for the county in which the tank is located if they cannot be maintained at the closed facility.

Where the results of the site assessment indicate that obvious, localized soil contamination was encountered and the analytical results of the confirmatory sampling show levels below the statewide standard/action levels, this closure report form (Sections I, II, and III) or some other acceptable site characterization report must be received by the Department within 180 days of verbally reporting the release.

Where the results of the site assessment indicate that no obvious contamination or obvious, localized contamination was encountered, but the analytical results of the confirmatory sampling show levels above the statewide standard/action levels, or where there is obvious, extensive contamination, Section 245.310(a)(8) of the Corrective Action Process (CAP) regulations requires that details of removal from service be included in the site characterization report. A copy of the completed closure report form should be submitted as part of the site characterization report to satisfy the requirements of Section 245.310(a)(8) of the CAP regulations.

I, Craig N. Herr, hereby certify, under penalty of law as provided in 18 Pa. C.S. §4904 (relating to unsworn
(Print Name)
falsification to authorities) that I am the person who performed the site assessment activities associated with the closure of the above referenced storage tank system(s) and that the information provided by me in this closure report (Section III) is true, accurate and complete to the best of my knowledge and belief.

Sample/Analysis Information (Attachment for Section III.)

Facility ID Number 09 - 30778[illegible]

¹ Where EPA Method 5035 is used, indicate sample collection option in the right-hand box of this column using the following codes:

P - Samples placed in a soil sample vial with a preservative present.

E - Samples collected and stored in a soil collection device which is airtight and affords little to no headspace.

N - Samples placed in soil sample vial without a preservative present.

Site Location and Sampling Map - Use this page or suitable facsimile to provide a large-scale map of the site where storage tank systems were closed. Scales between 1" = 10 and 1" = 100 feet frequently work well. Include the following information as each applies to the site: facility name and I.D., county, township or borough, property boundaries or area of interest, buildings, roads and streets with names or route numbers, utilities, location and ID number of storage tank systems removed including piping and dispensers, soil stockpile locations, excavations or other locations of product recovery, north arrow, approximate map scale and legend. Also, show depth and location of samples with sample ID numbers cross-referenced to the same ID numbers shown on Page 10 of 11.

RT ENVIRONMENTAL SERVICES, INC.

MEMORANDUM

DATE: August 7, 2019
TO: Ali
FROM: Craig Herr
RE: DUE DILIGENCE INFORMATION / AGENT AUTHORIZATION
WARMINSTER SUNOCO SITE
SOIL DISPOSAL
RT PROJECT # 73057-01

Y:\RT Projects\73000 SERIES\73057-01\due diligence memo.docx

Enclosed is the due diligence information for the facility receiving the wastes generated at the above referenced facility during the monitoring well installation activities.

The material is proposed to be treated at Clean Earth, Inc. in Morrisville, Pennsylvania (Attachment A). The facility has the necessary permits and the appropriate insurance.

Please sign below indicating your authorization of the facility.

 8-7-2019
Authorized Signature - Facility Approval Date

When the material is removed, your signature will be required, as generator of the waste, for the paperwork which is required to accompany the material to the disposal facility. If desired, RT can act as an agent for the generator. Please sign below indicating your authorization for us to sign manifests and bills of lading.

 8-7-2019
Authorized Signature Date

RT appreciates this opportunity to be of further service on this project. Please call me at (610) 265-1510 ext. 215, if you have any questions.
